

Are you happy with how your pension Grows?

To grow your money for retirement, your pension fund invests some of it in companies all over the world like Unilever, Google and Apple.

When these companies make a profit, the pension fund - now a company shareholder - gets a share. This is how your pension grows.

They will have stronger profits in the long-run...right around the time you'll need your pension!

Protect your pension now. Ask your pension provider how it invests your money and see if they have ethical, responsible and sustainable options.

However, your pension could be invested in companies using your money in ways you don't like.

- Cluster bombs and other weapons
- Discrimination based on race, gender or sexual orientation
- Tax evasion

Pornography

Tobacco

Paying unfair wages

You don't have to let this happen.

Most pension providers have an ethical, sustainable and responsible pension option.

You can have a pension that grows from investing in good companies that think about society and the environment as well as making a profit.

These companies are the best choice for your pension because they are much better prepared for the future.

Make money and make a difference.
